

16 December 1986

MEMORANDUM FOR THE RECORD

SUBJECT: INTERNET Microwave Relay

1. A green line coordination was conducted today with [redacted] on the Special Use Permit application concerning the subject relay. The details of pending actions and who had the action was reviewed. It was pointed out that Overseas Telecommunications, Inc. would submit the application and that there would be no reference to Government, FBIS, involvement in the action.

25X1

2. It was pointed out that the Field Engineering Division would be willing to provide a briefing to the DDA if [redacted] thought that it would be appropriate. [redacted] thought that this probably would not be necessary. Pursuing the application through the zoning board and the county supervisors would be initiated as soon as possible resulting in a potential for the permit, effective in the February/March time frame. The permit and the lease would suggest a construction activity and subsequent site activation in March if the schedule is adhered to.
